just heads up  
sent you now the email cc about the message that I reply to the journal Biomimetics MDPI from Switzerland  
check it out  
there is one little thing I need your help with.  
and you can use my credit to pay for it  
or  
if you prefer, you can pay and I send you a Venmo.  
that's very important  
--- about the date of the paper submission. we have a proven evidence that their system confirmed that the whole article was received on: Monday December 29 2025 at 5:11 pm. yet, they changed the stamp for the paper as if it was received 24 hours later. check here:

Outlook

[Biomimetics] Manuscript ID: biomimetics-4099156 - Submission Received

**From** susy@mdpi.com <susy@mdpi.com>  
on behalf of  
Editorial Office <biomimetics@mdpi.com>  
**Date** Mon 12/29/2025 5:11 PM  
**To** Cavalcanti, Adriano <adriano.cavalcanti@stcloudstate.edu>

they are committing fraud

7:29 AM ✓/v

this is what I can predict will happen

7:29 AM ✓/v

the paper will be published. that's for sure

7:30 AM ✓/v

that's why they are asking me to send the the copyright signed

7:30 AM ✓/v

the issue now is about

7:30 AM ✓/v

if they decide to be ethical. and publish it in the right journal with the correct date of submission.

7:30 AM ✓/v

or

7:30 AM ✓/v

if they will do the maneuvering sending it to a lower tier journal. thus, altering the date of the paper publication. so, they managed doing the patent of our invention.

7:31 AM ✓/v

Oh I don't think it will go that way I am sure they will publish it. Praying for the best. But let's see what happens.

7:32 AM

it will publish. they are trying to move it from Biomimetics. and dump it to publish with the Data.

7:33 AM ✓/v

Oh I see

7:40 AM

Hi Yash

3:12 PM ✓/v

I will need your help. if you can

3:12 PM ✓/v

first. check the on going situation:

3:13 PM ✓/v

I share the most updated facts with John

3:13 PM ✓/v

also the paper was supposed to appear in this special -- for what our article was invited:

[https://www.mdpi.com/journal/biomimetics/special\\_issues/090K1R5AT2](https://www.mdpi.com/journal/biomimetics/special_issues/090K1R5AT2)

Dr\_Cavalcanti 2:55 PM

without explaining anything. they are trying force us to change the submission to the journal DATA MDPI. Doing so. If we press the button resubmit, we will do what they want us to do. which our electronic signature that the paper was not on 29th Dec 2025. nor 30th Dec 2025 (which is what they fraudulently claimed. but now they thought about it, and came to a conclusion that if we documented it, it will be characterized as Editorial fraud. that's why they are trying to have us press the button :: resubmit to DATA MDPI. because this way the submission of the paper will characterize as not on 29th Dec 2025. but as 31st Dec 2025. and at this point. given the seriousness of the issue, they should have answer our email already.

instead of it.

they are delay as much as they can. in hopes that 2025 will end. and then. they will force us to accept to reset the date of the paper submit to become tomorrow. i.e. 2026.

why? because they submitted a patent immediately after we have sent the paper to them.

if they don't reply in the next two hours. we will simply publish the paper online. and publish the manifesto about the incident.

the technology described in the paper will allow patent trolls and large corporation to become owner and proprietary of the neuron biofield from the humanity. and they know it. it will allow them in the years to come to block the use of the model we presented to be used for the good of humanity.

--- also. a side note: we submitted the paper on 29th. then on 30th around 2PM a technician from Biology break into our lab,

paper online, and publish the manifesto about the incident.

the technology described in the paper will allow patent trolls a large corporation to become owner and proprietary of the neural biofield from the humanity, and they know it. it will allow them in the years to come to block the use of the model we presented to be used for the good of humanity.

--- also. a side note: we submitted the paper on 29th. then on 30th around 2PM a technician from Biology break into our lab, without clear justification or any legal rights to be supposed to enter in our lab

Dr.\_Cavalcanti 3:09 PM

let me know if you have any questions.

cuddlyllama 3:28 PM

what the heck there was a lab break in and they submitted a patent that's wld

What is the thing for me to pay for?

Dr.\_Cavalcanti 3:34 PM

here is what I need someone to do. while I finished the manifesto:

here are things we need to do. immediately: 3:20 PM ✓

1. create a S3 Databucket open source on Wasabi, and unlock that link, as we will: upload all the evidence about the fraud they are perpetrating; then we will go to the Avatar, and we will create a new file in the file-opendata/brainwaves ... then we will 2. add two files: [README.md](#) with a manifesto and the link in the [README.md](#) file pointing to the open databucket

Edited 3:23 PM ✓

we need to do that. can you please help me with that. while I am preparing the draft for the manifesto, once I have manifesto in hands. I will send you the manifesto. so you can read it and add any changes to it.

3:25 PM ✓

for paying for the Wasabi, you can either use my credit card, or pay and I will send you the transfer or a Venmo.

3:26 PM ✓

if you can not do it, then let me know. and I will do it myself.

3:26 PM ✓

but we have to get it done before 2025 ends in US.

3:26 PM ✓

let me know if you have any questions

cuddlyllama AKA John

3:26 PM ✓

let me know if you have any questions

cuddlyllama 3:36 PM

taking a look at wasabi now

Dr.\_Cavalcanti 3:36 PM

once I finish the Manisto. I let you know.

when you create the S3 Databucket as open for read only. You need to add me with rights to edit it.

cuddlyllama 3:38 PM

Do you know the current password for the 3c gmail? My saved password is outdated

Otehrwise, I could set it up through my own gmail

Dr.\_Cavalcanti 3:39 PM

give me a second

good idea!

but

pay attention. we should either do not use Google Drive. or have a replica for the drive open source content: one with Google. and the other with Wasabi.

actually it is a good idea to have both.

btw. did you got the full paper?

here is the full paper. in case you didn't get it yet:

this is the original. sent on Dec. 29th. 5:11pm

then they came with a silly excuse, asking us to add two sentences and send it updated. -- doing so, trying to legitimate the date of the submission of the paper. postponing it to Dec. 30th.

and now. their latest estrategy was to then move the paper submission to the journal DATA. meaning with the additional manouvering. if we accept and press the button submit. it will change the stamp for the paper submission. from Dec. 29. to 30th. and then now to Dec. 31st.

and then now to Dec. 31st.

actually

they have not answered my email. it means. they hope that we will wait. it will pass and end the year 2025. they will replay only in 2026. to finally say:

either you accept having the paper published with the journal DATA MDPI. or we will not publish it.

Dr.\_Cavalcanti 3:47 PM

then. they believe that will just go quiet. and accept resubmitting it. even it would meant that they change the data stamp to way after the correct date that the paper was actually submitted for publication.

why doing so? because they understood that the framework of the technology we created, whoever have it patented will be able to control the human mind for the who humanity enslavement trough vibrational tunning and Fibonacci sacret geometry.

that's how the brain work. based on resonance acoustic frequencies

understanding that. allows your to either boost. or dump down any person mind capacity.
